A BILL FOR AN ACT

Concerning accountability in the elementary and secondary public education system.

Bill Summary

(Note: This summary applies to this bill as introduced and does not reflect any amendments that may be subsequently adopted. If this bill passes third reading in the house of introduction, a bill summary that applies to the reengrossed version of this bill will be available at http://leg.colorado.gov.)

Under existing law, the department of education (department) considers the performance of each school district and the state charter school institute (institute) on specified indicators when assigning accreditation categories. The bill creates a new performance indicator that measures the improvement achieved over the preceding 4 school years by a public school, school district, the state charter school institute, and the
state as a whole in student scores on state assessments and in closing the achievement and growth gaps. The bill directs the state board of education (state board) and the department to place the greatest emphasis on the academic growth performance indicator when determining the appropriate accreditation category for each school district and the institute.

Under existing law, the department may recommend that the state board remove a school district's or the institute's accreditation if the school district or institute is accredited with turnaround plan and fails to make substantial progress under the turnaround plan or the school district or institute is accredited with priority improvement plan or lower for 5 consecutive school years. If the state board removes accreditation, it specifies the corrective actions the school district or institute must take to be accredited again.

The bill repeals the authority to remove a school district's or the institute's accreditation based on performance under a priority improvement or turnaround plan. If a school district or the institute fails to make substantial progress under a priority improvement or turnaround plan and is accredited with priority improvement plan or lower for 5 consecutive school years, the commissioner of education must assign the state review panel to critically evaluate the school district's or institute's performance and recommend one or more corrective actions. The state board must specify the corrective actions the school district or institute must take.

Be it enacted by the General Assembly of the State of Colorado:
